WINE PREPARATION

The Alivetto estate is affiliated with the Aghione Cooperative Cellar, located in the south of Corsica. Vines prosper a clay-limestone soils, shaded by clay-silty soils, red sands and rolled pebbles. The vineyard enjoys ideal sunshine and a temperate climate due to the proximity of the sea and its proximity to nearby mountains. The varietals are vinified separately. Cold liquid stabilization precedes fermentation at controlled temperature. Breeding is done on fine lees with baton.
